Professional Summary

Computer Science undergraduate at VIT Bhopal with hands-on experience in backend development, databases, API integrations, and data-driven applications. Experienced in building structured workflows and practical technology solutions, with a strong foundation in automation, data management, and system integration.

Education

Vellore Institute of Technology, Bhopal <i>B.Tech Computer Science and Engineering - CGPA: 8.66/10</i>	Sept 2023 - May 2027 (Expected)
--	---------------------------------

Experience

Shell Info Technologies Pvt. Ltd. <i>Data & AI Intern</i> - Designed and integrated Retrieval-Augmented Generation (RAG) pipelines with vector databases to build context-aware AI applications, working with structured data and retrieval workflows. - Worked with Azure AI Foundry to explore and deploy AI models, gaining practical exposure to enterprise systems, cloud-based tools, data workflows, and system integrations.	May 2026 - June 2026 <i>Remote</i>
Transmutes.ai <i>Technical Intern</i> - Assisted in building and refining the company's landing page for a new product launch, contributing to a customer-facing digital workflow in a remote environment. - Explored AI agent architectures, MCP servers, and agentic AI workflows through hands-on learning, technical research, and experimentation.	Oct 2025 - Dec 2025 <i>Remote</i>

Technical Projects

<u>DeliverySync</u> - Full-Stack Last-Mile Delivery Management Platform React.js, Node.js, Express.js, PostgreSQL, Prisma, JWT, REST API - Built a database-driven delivery management platform supporting structured workflows across 3 user roles (customer, agent, admin) and 20+ RESTful API endpoints for order management and status tracking. - Designed automated business logic for shipping-rate calculation based on package weight, delivery zone, and order type, validated with 14 unit tests covering core pricing logic. - Implemented role-based workflows, secure JWT authentication, and an immutable append-only audit trail to maintain structured order-status history and process traceability; deployed on Vercel and Render with a managed PostgreSQL database.	Aug 2026
<u>RepoMind Space</u> - AI-Powered Repository Intelligence Platform Python, Flask, MongoDB Atlas, Google Gemini API, HTML/CSS/JS - Built a data-driven platform enabling users to import GitHub repositories or ZIP archives and automatically generate 4 structured documentation artifacts using the Google Gemini API. - Integrated the Google Gemini API to automate documentation generation and support AI-powered analysis of imported codebases through application workflows. - Implemented Google OAuth 2.0 with bcrypt hashing, alongside isolated workspace management for structured artifacts and chat history in MongoDB Atlas.	June - July 2026

Skills

Business Systems & Automation: Workflow Automation, Data Structuring, Process-Oriented Application Design, System Integration
Programming Languages: Java, Python, C++
Core CS Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Computer Networks (CN), SDLC/STLC
Data & Databases: MongoDB, SQL, PostgreSQL, Prisma ORM, MongoDB Atlas, Data Cleaning, Data Preprocessing
Integrations & Web: REST APIs, API Integration, Google OAuth 2.0, JWT Authentication, HTML, CSS, JavaScript, Flask, React.js, Node.js, Express.js
Cloud & Tools: AWS, Azure, Git, GitHub, CI/CD, Google Gemini API, XMind (MindMaps)

Certificates & Achievements

IBM AI Engineering Professional Certificate - Coursera, IBM Skills Network (Feb 2026), 13-course program covering Deep Learning, LLMs, LangChain, RAG, PyTorch, TensorFlow & Keras Introduction to Machine Learning - NPTEL, IIT Madras (Jan - Apr 2025), Elite Certification, Score: 66%, Top 25% among 6,009 certified candidates nationally MongoDB Certified DBA - MongoDB Inc. (Jul 2025), demonstrated professional-level database administration skills recognised by MongoDB Inc.
